Uvod

Korišćeni Programski jezici

Veb sajt je kreiran korišćenjem jezika: HTML, CSS i JavaScript

kao i JS biblioteke jQuery

- Funkcionalnosti

Dinamičko generisanje header-a i footer-a na svakoj strani,

dinamičko generisanje kataloga za odrabir i kreiranje paleta blokova.

Blokovi se mogu filtrirati i sortirati po svojim bojama i aktegorijama koje su dinamicki ubačene u drop down listu i check box-ove na osnovi koje boje i koje kategorije trenutno postoje.

Filtriranje je moguće obaviti i putem pretrage imena blokova.

Sortiranje je moguće odraditi po u rastućem i opadajućem imenu kao i po rastućem i opadajućem id-ju blokova.

Blokovi su dinamički prikazani iz JSON fajla, u stranam od po 12 blokova sa po 2 red od po 6. Broj strana zavisi op toga koliko blokova se nalazi u JSON fajlu.

Blok šema navigacije na sajtu

Kod koji kreira header sajta:

```
$("body").prepend(`
  <header>
    <ul>
      <li><a href="index.html">Home</a></li>
      <li><a href="palletMaker.html">Pallet maker</a></li>
      <li><a href="gallery.html">Gallery</a></li>
      <li><a href="author.html">Author</a></li>
      <li><a href="author.html">Documentation</a></li>
    </ul>
  </header>
`)
```

Blok šema foote-a na sajtu

Kod koji kreira footer sajta:

```
$("script:first-of-type").before(`
<footer>
  <div>
    <h3>Navigavion:</h3>
    <ul>
      <li><a href="index.html">Home</a></li>

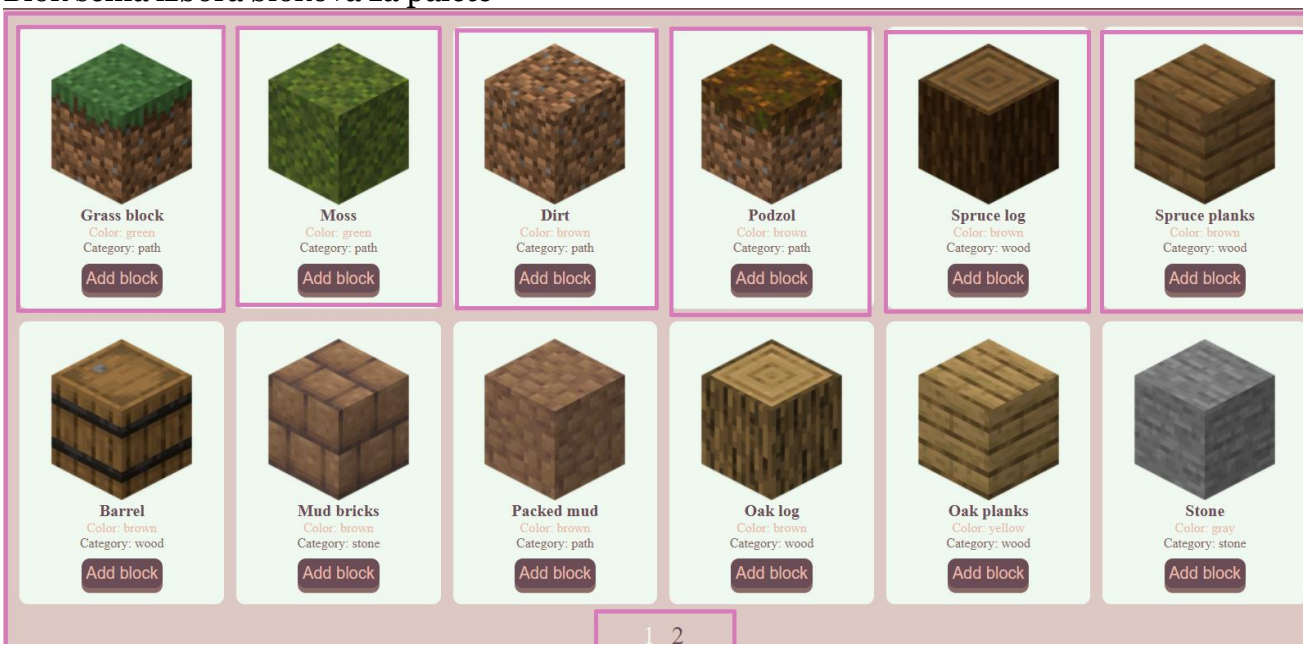
`)
```

Blok šema izbora blokova za palete



Kod kori kreira izbor torti:

```
appText=`<div class="item">`
    appText+=`
    <img src="resources/images/`+block.img+`"/>
    <h2>`+block.name+`</h2>
    <p class="blockColor">Color: `+block.color+`</p>
    <p class="blockChategory">Category: `+block.category+`</p>
    <p class="invisibleId">`+block.id+`</p>
    <button class="addBlock">Add block</button>
    `
    appText+=`</div>`
    $(".page").append(appText)

}
```

Dont know how to make pallets? Not a problem. Here is
the guide how to use our website.</p>
```

 To make you own pallets navigate to the "<a href="palletMaker.html" class="guidImp">Pallet maker</a>" tab of the website and there you will be able to chose from a variety of blocks.

 If you know what block you are looking for there are filters on the left side of the page to help you find your desiered blocks quicker (blocks can be filtered by color, chategory or by name).

 Once you have found the block that you want to add to your pallet then just click on the "Add block" button and the windowd will open where you will see all your pallets.

 If you dont have any pallet already you will be able to create your own pallet by clicking on the "" sign in the top right. From there you can give your pallet a name and press "create". Once created your pallet will be dispayed there. All pallets can contain a maximum of 6 blocks. And for now you can create up to 6 pallets.

 To add the block to the pallet that you want just click anywhere on the pallet and the block will be added to the pallet. If you want to add other blocks just press "Done" and find another block that you want to add to the pallet and repeat the proces until you made you own pallet the way you want.

```
        <p><i class="fa-solid fa-caret-right rightArrow"></i>
By pressing "<span class="guidImp">Clear
pallets</span>" button, all pallets that you have created
can be deleted and you can make different ones. We hope
that this guide was helpfull !! </p>
